Objective: HTML Task - Structure a Marketplace App Page using just HTML codes.

1. **Basic Structure:**

   - Create an HTML document with the following structure:

   ```html
   <!DOCTYPE html>
   <html lang="en">
   <head>
       <meta charset="UTF-8">
       <title>Marketplace App</title>
   </head>
   <body>
       <!-- Your content goes here -->

   </html>
   ```

   - Make sure to include the necessary meta tags and set the title of the page.

2. **Header Content:**

   - Use the **<header>** tag to create a header section.

   - Inside the header, use the **<h1>** tag to display the title.

   - Include a **<p>** tag for a short description.

3. **Main Content Section:**

   - Use the **<main>** tag to create a division for the main content of the page.

   - Inside the **<main>**, include a **<section>** with an **id** of "products" for the featured products.

4. **Product Details Form and Table:**

   - Inside the **<section id="products">**, create two **<div>** elements with a class of "product" to represent two featured products.

   - Within each "product" div, include:

     - **<h3>** for the product name.

     - **<img>** tag with a placeholder image (e.g., via.placeholder.com).

     - **<p>** for the product description.

     - **<ul>** for details like price, category, and rating and etc.

     - **<div>** with a class of "email-field" containing a label and email address.

     - **<button>** for "View Details."

5. **Footer Section:**

   - Outside the **<main>** section, use the **<footer>** tag to create a footer section

   ```html
   <div class="footer">
       © LEXICON Växjö
   </div>
   ```
